

Bicycle Parking No.1 in front of Hankyu Railway Minamisenri Station West

Location : Suita-city, Osaka

Completion : June 2010

Owner : Suita-city

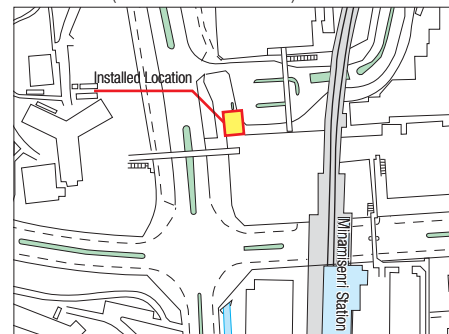

Installed as the first public underground mechanical parking lot in Kansai Region

Image of Installation

As public bicycle parking lot in Kansai Region, an underground mechanical parking lot was installed for the first time. Along with the station-front redevelopment project of the Hankyu Railway Minamisenri Station, 2 ECO Cycle units were built at the traffic circle. By concentrating several aboveground bicycle parking lots to the underground of the train station plaza, the space in front of the station is utilised effectively and highly convenient parking has become available.

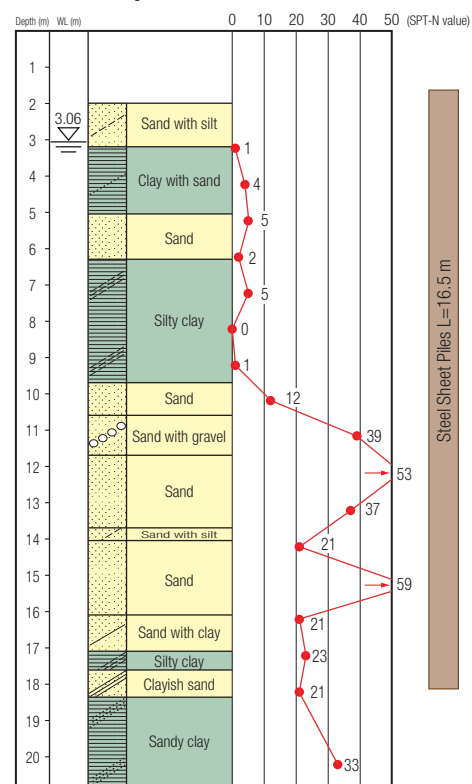

Location (At Start of Construction)

ECO Cycle Specifications

- Units : 2
- Total Capacity : 408 bicycles (204 × 2 units)
- Usage : Monthly use
- Card Type : IC card

Borehole Log

※ *SPT-N values over 50 are extrapolated numbers.
